🏠 Los Angeles, CA, USA

PROFESSIONAL OVERVIEW

I am a Results-driven Software Engineer with 7+ years of experience developing and maintaining scalable applications across web and mobile platforms. Experienced in Android development with Kotlin, REST API integration, debugging, and working with existing production codebases. Skilled in writing clean, maintainable code and implementing unit/UI testing to improve application reliability and performance. Strong background collaborating with distributed teams and delivering high-quality solutions for startups and enterprise clients in healthcare, banking, energy, and retail industries.

WORK EXPERIENCE

Senior Full Stack Software Engineer

Inova Health System – Falls Church, VA | Jan 2024 - Present

- Led full-stack development initiatives for enterprise healthcare platforms using React, TypeScript, Node.js, Kotlin, and AWS services, supporting high-traffic patient engagement and scheduling systems used by 1.5M+ users.
- Engineered scalable backend APIs and microservices while contributing to Android/mobile feature delivery and production support within a large distributed engineering environment.

Principal Full-stack Engineer

Dominion Energy – Richmond, VA | July 2022 – December 2023

- Designed and developed enterprise-grade applications for operational analytics and customer service platforms using React, Node.js, Kotlin, REST APIs, PostgreSQL, Docker, and AWS.
- Built internal tooling and monitoring solutions that enhanced real-time operational visibility, deployment reliability, and engineering productivity.
- Introduced testing and DevOps best practices including CI/CD automation, containerized deployments, and structured debugging workflows to reduce release overhead and improve system stability.

Senior Full-Stack Software Engineer

Truist Bank – Charlotte, NC | March 2020 – June 2022

- Developed secure web and mobile-enabled internal platforms for fraud detection, compliance reporting, and operational risk management within a highly regulated financial environment.
- Delivered scalable frontend and backend solutions using React, Node.js, TypeScript, Kotlin, SQL, and cloud-native services while collaborating with distributed engineering and compliance teams.

EDUCATION

Bachelor of Science in Computer Science

George Mason University 2018

SKILLS

Android Development

Android SDK
React Native
Kotlin
Jetpack Compose
XML Layouts
MVVM Architecture
Coroutines
Retrofit
Room Database

Backend & APIs

Node.js
Python
.NET Core
Java Spring Boot
Rest APIs
Firebase

Testing & Code Quality

JUnit
Espresso
Unit Testing
UI Testing
MockK / Mockito
Debugging & Bug Fixing

Senior Full Stack Software Engineer

Truist Bank – Charlotte, NC | March 2020 – June 2022

- Implemented advanced internal tools for fraud detection, risk management, and regulatory reporting, strengthening compliance posture while reducing manual review efforts by 45%.
- Spearheaded the development of consumer and small business banking platforms using React, .NET Core, and SQL Server, managing high-volume transaction systems for millions of users.

Full-stack Engineer

Sentara Healthcare – Norfolk, VA | September 2018 – February 2020

- Developed hospital operations platforms, including staff scheduling, bed management, and patient flow systems using Angular/React and Java Spring Boot.
- Played a key role in cloud migration strategy, modernizing legacy applications and establishing scalable, secure infrastructure for growing telehealth and patient portal services.

Full-Stack Engineer

Lowe's Companies, Inc – Mooresville, NC | May 2018 – August 2018

- Contributed to omnichannel retail platforms, building inventory management, supply chain visibility, and customer loyalty applications during the early stages of major digital transformation.
- Developed responsive web applications and backend services that supported BOPIS and enhanced in-store operational efficiency.

SKILLS

Tools & Workflow

Git & GitHub

Android Studio

CI / CD

Agile / Scrum
